

## ATD-83250 6 ft. Magic Siphon Hose Owner's Manual

### Features

- Magic siphon safely transfers gasoline, diesel and water
- Transfers up to 5 gallons per minute
- Antistatic PVC hose with brass fitting
- Simply shake the hose up and down to start the transfer with no risk of swallowing harmful liquids

### Instructions:

- Drain all liquid from hose prior to using (fig. 1)
- Submerge pump end into the liquid to be siphoned, then shake pump vigorously in a quick up and down motion. This action will cause the liquid to fill the hose and siphoning will begin (fig. 2)
- Important: End of tube must be lower than the pump end before siphoning will start (fig. 3)
- Once the siphoning process begins, stop shaking pump end
- To stop siphoning - remove pump end from liquid
- Drain all liquid from hose before storing in a cool dry place

### WARNING:

- Do not put magic siphon in mouth
- Once the siphon has been used to transfer non-food related material, it should not be used to transfer anything that will be ingested.
- Wear safety glasses when using tools.
